

# IQ CONTROL

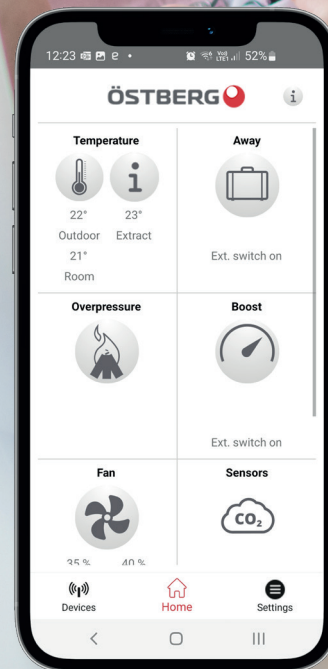

Our intelligent control system for residential ventilation provides a healthy and energy-efficient indoor climate. Connect via internet, radio, Bluetooth or wired to your HERU air handling unit.

## IQC App

**NEWS!** App control that gives end users and installers access to all functions wherever you are. Included as standard upon delivery and replaces IQC Display as standard controller.

### TECHNICAL INFORMATION

- **APP** – Full function app that controls, configures and boots your HERU
- **FUNKTIONALITÄT** – Same as HERU IQC Display
- **CONNECTION** – Connects via Bluetooth or internet
- **SETUP** – Configuration of HERU
- **HERU SOFTWARE** – Software update in your HERU via notification in your IQC App (Android devices) or via computer (iOS or Android).

## IQC Easy

**NEWS!** Wired control panel with basic end-user functions.

### TECHNICAL INFORMATION

The IQC Easy Controller is a new accessory that is used as a supplement for basic functions and efficient control of your air handling unit. The control unit is wired and intended for wall mounting.

**IQC EASY** – used for settings of:

- Desired temperature (18–24°C)
- Boost
- Overpressure
- Away mode
- Displays active alarms (you need IQC App or IQC Display to reset alarms)

## IQC Display

Advanced control panel for end users and installers.

### TECHNICAL INFORMATION

- **Graphical User Interface** – User friendly interface customized for the end user and the installer
  - Installation wizard that steps the installer through the installation
  - Status bar for quick overview
  - Quick info explaining the active panel
- **COLOR THEME** – Choose a light or dark color theme to match the interior design of your home
- **CLOCK**– Screen saver that also shows time and temperature
- **ALARM HISTORY** – Map the device's condition and facilitate service
- **COMMUNICATION** – Control your residential unit via radio and/or wired\*

\*A docking station is required for wired communication
